Infectious Disease Control Procedures

From time to time there are outbreaks of potentially fatal diseases such as the Coronavirus. During these times, New Life Christian Fellowship and its members, will exercise particular care to avoid spreading these diseases.

We will do the following:

- provide hand sanitisers to encourage regular hand washing
- remove cloth towels from the bathroom and encourage use of paper towels only
- provide tongs and other food handling utensils to minimise hand contact with food at morning tea, lunch and other community meals.
- pay attention to the advice of health experts and implement their recommendations

We encourage members to do the following:

- if you or family members are showing symptoms of any respiratory disease such as excessive coughing, sneezing etc then stay at home.
- use standard hygiene when coughing or sneezing i.e. use of tissues, cough into sleeve etc.
- wash your hands often, especially before eating, including food at church
- make sure that children also wash their hands when they come into the church after playing outside
- use tongs or other implements provided for food handling
- Offering counters should wash their hands after counting the money

Policy first approved March 14th 2020
